- ~ Must call out any PMS colors or CMYK equivalents.
- ~ Must supply any logos included as vector (.eps/.ai) files.
- ~ Must supply your own photos.
- ~ Must supply your own fonts.

Color Management

Please use the Pantone Matching System (PMS) whenever possible in order to achieve the best color matching with your file. Understand that color is device dependent and the same PMS color will look different depending on the machine and substrate. Talk with your sales representative and ask to see a PMS color chart printed on the substrate and machine that you wish to have your file printed to guarantee better color matching.

Matching to a customer's supplied Laser printout is only acceptable if PMS numbers are called out. We can provide a PMS chart or color strip of your artwork upon request. ***Please note that our machines use four color process and some Pantone colors are impossible to match, issues of that nature will be dealt with on a case by case basis.***
